Bite blocks

	Product Code	Order No.	Characteristics		ø Inner	Unit
	BYT1-A3-20	500309	Standard, white, with OEKO TEX® strap		20 mm	100

Accessories

Safe and simple removing of specimens

Unrestricted suction function

Two removable strainers

KOALA

Continuity in use!

Of course it cannot handle two kilos of eucalyptus, but it can manage countless polyps cleanly and safely. The two removable strainers of the koala polyp trap facilitate easy removal of tissue specimens

and therefore protect against contamination with biomaterial. The suction function is limitless throughout the procedure.

KOALA Polyptrap

Product Code	Order No.	Characteristics	Unit
TRP1-S2	502499	2 integrated strainers, white	25
TRP1-S4	502536	2 integrated strainers, white and 2 additional strainers, grey	25

Minimised contamination risk

On account of the two integrated strainers of the new Koala it is no longer necessary to deposit a contaminated strainer outside the system. That minimises contamination with biomaterial, and hence the infection risk.

Accessories

#clean

Protection head guards the working channel

Enhanced cleaning efficiency thanks to dense bristles

Optimal force transmission

RACCOON Brush

Conscientious and reliable cleaning

Raccoon cleaning brushes ensure optimal force transmission when cleaning your endoscope. The distal protection head reliably

guards the working channel. The dense brush structure makes cleaning even more efficient.

Accessories

#safe

Optimised tightness

Less friction

Easy to open and close

FROG

Protects and seals tight!

Grips as tight as a frog's suction pad: the novel Frog biopsy valve seals especially tight, yet remains easy to open and close.

Less friction allows quicker and less complicated insertion of instruments. Supplied in a practical, space saving dispenser with mounting option.
